Novell Cluster Services 1.7.1
Advanced Technical Training

Professional courseware with hands on exercises will guide you through all technical details of NCS and resource configuration with troubleshooting tips. The course is based on an implementation of NCS 1.7 on NetWare 6.5 using the iSCSI protocol. Most importantly, as the architecture of this technology is predominantly the same as previous versions of NCS, you will receive the same benefits whether you have a current implementation or are planning a new one. Storage Management features from Netware 6 will also be covered.

HIGHLIGHTS

- ↘ Understanding, planning NCS and implementing Storage Area Network including iSCSI.
- ↘ Installing and managing Novell Cluster Services using iSCSI protocol.
- ↘ Creating cluster resources (DHCP, DNS, NDPS, GroupWise, iFolder, FTP, etc.)
- ↘ Tuning a cluster configuration (Operating System/ Novell Storage Services)
- ↘ NCS architecture and failover algorithms
- ↘ Troubleshooting

PREREQUISITES

- ↘ Knowledge of NetWare Operating System
- ↘ Good understanding of Novell Storage Services (NSS) on NetWare 6
- ↘ Course 3000 "Upgrading to NetWare 6" or Course 3018 "Upgrading to NetWare 6.5"

DATES

Canberra	1-3 February 2005
Brisbane	15-17 March 2005
Sydney	22-24 March 2005
Adelaide	12-14 April 2005
Perth	12-14 April 2005

AUDIENCE

ATT courses assume experience with the subject matter. These courses are delivered on an engineering level. Topics covered include support issues, in-depth architectural reviews and advanced enterprise solutions. This training is fast-paced; highly technical that consists of both lecture and hands-on labs.

COST

Cost is AU$1,950.00 plus GST

Earlybird Special: Book 4 weeks prior to the course date and receive a 20% discount
